Smooth Skin —
for envious looks

Z
wave

the easy way
to get
smooth skin

Your way to get
a perfect body:
Visible results in
just a few weeks

Visible results on the abdomen, legs and buttocks

To treat cellulite, ZWave transmits powerful shockwaves into the tissue. Due to this technology, it is now possible to treat the weakness of the connective tissue on the abdomen, upper arm and cellulite on the legs and buttocks quickly, gently and very effectively. In one study, the thigh circumference was reduced up to 7 % (4,3 cm).

High energy radial shockwaves

High energy radial shockwaves were adapted to efficiently treat cosmetic conditions, especially tissue and muscles weakness and cellulite.

The exceptional advantages are:

- painless treatment
- no downtime after treatment
- noninvasive treatment
- visible results
- long lasting effects
- clinically approved

Is this treatment painful?

No, quite the contrary. Many patients say this treatment feels similar to a relaxing massage.

How quickly are the changes visible?

Clear changes can be seen after only 2-3 sessions. Your skin will get smoother and noticeable firmer. It usually takes 6 to 10 sessions to complete the treatment.

Are the results long-lasting?

Regular refresher sessions, exercise and a balanced diet will ensure long-lasting results.

before treatment

after treatment

Studies have shown that a shockwave treatment directly after Cryolipolyse™ and other applications for fat reduction can almost double the treatment effects with regard to fat reduction. Please ask for the various combinations to improve fat reduction & skin tightening at the same time.

Smooth Skin –

for envious looks

Shockwave applications:

- Cellulite
- Skin tightening
- Aesthetic scar treatment
- Lymphatic drainage support
- Stretch marks
- Weakness of the muscles and connective tissue

and in combination with Soft Laser, Radiofrequency, Ultrasound and Cryolipolysis™ for better and faster fat reduction.
